

COUNCIL POLICY

CURRENT

SUBJECT: TECHNICAL REQUIREMENTS FOR THE TRANSPORTATION
DEMAND MANAGEMENT ORDINANCE
POLICY NO.: 800-13
EFFECTIVE DATE: December 11, 1989

BACKGROUND:

The Transportation Demand Management Ordinance (O-17349) was adopted by Council on September 26, 1989. The goal of the Ordinance is to reduce traffic congestion and improve air quality by reducing the number of employees who drive alone during peak traffic periods. The Ordinance affects employers with 15 or more employees, and building owners and developers of commercial, scientific research, mixed use or industrial-zoned buildings over 25,000 gross square feet.

PURPOSE:

To establish as policy the technical requirements that affected employers, building owners, and developers shall follow to be in compliance with the Transportation Demand Management Ordinance.

POLICY:

It shall be the policy of the City Council that all parties which must comply with the Transportation Demand Management Ordinance (O-17943) shall follow the guidelines established in the Technical Requirements, City of San Diego Transportation Demand Management Ordinance as documented in the office of the City Clerk.

HISTORY:

Adopted by Resolution R-274858 12/11/1989
